OVERVIEW

Mechatronics technicians **install and repair** automated manufacturing equipment in large facilities. Unlike regular electricians, these technicians regularly work with mechanical electronics – things that move and make manufacturing happen.

Because it's a technical field, mechatronics technicians need an **associate's degree**, which takes two years to earn.

Mechatronics technicians show excellent **job satisfaction!** Because automation technology is always advancing and changing, there is always something new to learn. This lets technicians increase their value the longer they are in the industry.

A modern field with the newest manufacturing technology.
