OVERVIEW

Construction managers make one of the **highest salaries** in the construction industry, at an average of \$102,430/year. This is because of the knowledge and skill required to do this job effectively.

The construction manager is the person **in charge** of any construction project, residential or commercial. They are involved in the planning, construction, and completion of the building. They accomplish all this by knowing about every part of construction including plumbing, carpentry, electricity, and masonry.

Construction managers must also know about the **financial aspects** of construction projects: bookkeeping, budgets, timetables, cost estimates, and other such technical work. They need to keep clients satisfied with progress reports and staying within budget.

One of the highest salaries in the construction industry.
